

ABM Atlas ... PCA & UMAP projections of 207 locus×phenotype associations (27–feature self–contained model, locus–collapsed)

Top: PCA. Bottom: UMAP. Columns: expert EPIC tiers, four unsupervised classifiers, and the continuous latent-PGx prioritisation score (triangles = gated candidates).

Expert EPIC classes coloured by latent-PGx score
Each panel shows only the named expert class (top: PCA, bottom: UMAP); shared latent-PGx colour scale and axes.

ABM Atlas ... cluster names, EPIC overlap and description (v20, 34-feature model)

EPIC: E=Effect P=Predisposition I=Indication C=inConclusive. Overlap = % of each cluster's members falling in each expert EPIC tier.
